Program Content Detail

Segments

Segment 1 – Evolutionary Levels of Consciousness & Everything about the Nodal Axis

In the first segment, we define the progressive **levels of the soul's evolution** and identify how the same chart can express itself differently through the various evolutionary stages. It is absolutely essential to understand these dynamics in order to accurately analyze a chart and provide effective counseling.

The Nodal Axis of the Moon: the transcendence of duality. In the birth chart, the Nodal Axis portrays the core emotional and evolutionary needs of the soul. It is a relatively simple equation that is incomparable in its precision and depth. We will explore the classic archetypes of the Nodal Axis, as well as its particularities **when planets form aspects to the axis** and alter its regular progression (an understanding that provides a rich perspective on the nature of the soul incarnated and its evolutionary processes).

Segment 2 – Neptune: Timelessness meets Time & Space

In Segment 2, Maurice presents his revolutionary perspective of **Neptune, the 12th house, & Pisces**. Neptune represents the beginning and ending of all things; thus, it contains the most preliminary needs and instincts as well as all clues about the highest potential of a being. The most basic codes and truths about life that eventually emerge through the rest of the zodiac are seeded in the Neptunian paradigm. The placement of Neptune in every house and sign will be discussed in order to understand the particularities of its influence. This material is unique and most fascinating!

Segment 3 – Uranus & Pluto

Uranus and Pluto are the two outer planets that instigate progress and evolution towards the truth.

Uranus symbolizes our highest achievement as controlling beings and the peak of our intelligence and creativity that aims at dominating the play of life. We will explore this fascinating archetype to understand where we play God, and actually become Gods, at least for a while. Uranus represents the apex of humanity and its shadows!

Pluto represents the soul's need to outgrow its own limitations, exposing the soul to its deepest weaknesses in order to change and heal; it represents the evolution of the emotional body. The recognition of limitations sometimes results from experiencing pain; thus, Pluto symbolizes all ways to overpower pain when working through our limitations.

Segment 4 – Chart Interpretation

It is now time to put insights into practice and learn to synthesize the chart elements in a cohesive and meaningful way. The more one practices on actual charts, the sharper one's analysis becomes. In this segment, each participant prepares an analysis of the chart of another class participant. With Maurice's guidance, both counselor and counselee gain tremendous insight as the chart magically comes to life—a truly revealing and empowering experience. Usually between eight to ten charts are read, allowing participants to gain an understanding of their own chart and lives, as well as others. In the course of learning about chart interpretation, a portion of the study is dedicated to the study of **aspects** between planets.

Segment 5 - Relationships in Astrology - Sexuality, Synastry & Composite

In Segment 5, we focus on the different dimensions of relationship dynamics. Why have two souls come together? What is the potential of a given relationship and the inclinations of the individuals involved? How do we create healthy and growth-related relationships? We

explore different relationship dynamics including **emotional and sexual needs and identify compatibility in the chart**. The segment includes the study of **synastry** (using double wheels to understand how the chart of one person interacts with the chart of another and identifying in such a way the meanings and purposes of their union and interaction) **and composite charts** (looking at the chart of the union to understand the expression of the union and its reasons for being).

Segment 6 - Transits, Solar Arc, Progressions

In this segment we begin by learning about the influence of **transits** using participants' life events as examples to understand the technicalities as well as the karmic implications of life events. In addition, we also study important planetary pair cycles.

The following session is dedicated to the study of **solar arc and secondary progressions**, probably the most powerful predictive techniques existing! Solar arcs provide the insight to nail down precise occurrences in the life of a person. Our focus is on refining our skills to better identify significant themes in this context.

Segment 7 - Chart Analysis and Counselling Skills

The focus of this segment is about developing a sharper eye when analyzing birth charts and thus developing the capacity to identify core dynamics without excessive preparation before meeting a client. This includes the practice of "speed readings" where one is challenged to address chart analysis with progressively less preparation time.

Another chapter is dedicated to **the psychology of counseling** and ways to address client needs and different personalities, focusing on proper ethics, boundaries, and effective communication—to ultimately provide a deeply valuable reading for the client.

Participants are invited to do three readings with clients they have never met before. Provided that all the course requirements have been completed by then and that the three readings are successful, **the student is then certified!**

Workshops

■■■ Saturn: Time & the Karmic Wheel

We discuss the meaning of karma and the association of Saturn with the reality of time in the chart. Saturn is positioned in every house and sign to clarify these fascinating spiritual principles.

■■■ Medical Astrology: Physical and Mental

Astrology is a powerful tool for preventive medicine—during this workshop we learn to associate astrological signatures with medical conditions and then discuss diets, treatments, and lifestyles that support health and preventive approaches.

■■■ Chiron: Humility of a Master

Beyond any doubt, Chiron has proven its relevance in the chart. In this workshop, we discuss the evolutionary dynamics associated with this unordinary body and position it in every house and sign.

■■■ Retrograde Planets

From Mercury to Pluto, reviewing the retrograde phenomenon in the natal chart and by transit sheds invaluable light on evolutionary dynamics.

■■■ The Ascendant

A fresh perspective that helps one understand the dynamics of the Ascendant sign through the intrinsic association with the sign that opens the 12th house cusp.

■■■ Planetary Nodes

While tremendous emphasis is rightly put on the Nodal axis of the Moon, it is useful to realize that all planets have a nodal axis. We will explore the important evolutionary dynamics of the planetary nodes on a personal and then a collective level.

■■■ Asteroids and newly discovered Planetoids

We explore Ceres, Eris, Makemake, and Haumea—new kids on the block!

Testimonials

In reviewing my past couple year's study of Evolutionary Astrology with Maurice Fernandez, I note a number of changes. I have studied astrology for over 30 years with a number of different teachers and Maurice stands out as unique and gifted among them. I personally believe that the greatest contributing factor to this is his own dedication toward using (and fusing together) astrology and yoga as a path toward personal "awakening", "opening the heart", or "enlightenment," all of these being different words for the same process of self evolution. As you teach from the level of consciousness that you have achieved, the quality and depth of Maurice's teachings reflect a high level of personal evolution, awareness, love, and devotion to the evolutionary process of others.

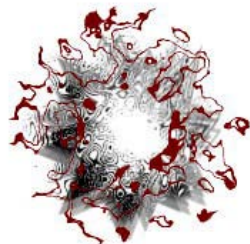

The interpretations, insights, and applications offered in the course are very clearly communicated, precise in their meaning, and often contain new perspectives I've not heard anywhere else. These teachings have both served to expand my understanding of astrology as well as inspired me to improve and expand my writing, counselling, and teaching practice. They serve as tremendous food for thought which leads me to connect more and more of the dots together in new ways within my own work. I feel this is truly ground breaking, new material that can and should be shared widely.

Lastly, I would like to note that Maurice's workshops which combine both the study of astrology and kundalini yoga can serve as a personal retreat as much as strictly an educational experience. By that I mean that the time spent and information shared has brought about inner, personal change and a deepening of my consciousness, not just more notes to study and mental stimulation which I find far too much of in the broader astrological community. I feel that this deepening of my consciousness allows me to bring more healing through my astrological work which is what I believe it is all about to start (and finish) with.

I'm very grateful for my relationship with Maurice and would be glad to speak with anyone about my experiences with him and his work at any time. T.L

Maurice joins his mind with his heart to bring brilliance to his teaching. He interprets the symbolic language of Evolutionary Astrology with detail, driven by insight, which makes revelation a personal and profound experience. It has been a privilege to be his student."

J.S - The Complete Course

Although I have not completed the course yet, I have thoroughly enjoyed every minute and look forward to continuing. After studying astrology for many years and reading a lot of books, I have finally achieved a level of conceptual understanding from Maurice. His teaching style is very conducive to learning and understanding the material and he is very patient with questions. Also very important is his personal attention and the interaction between the students. In addition, I have made amazing friends from this experience, as well as enjoying traveling to Boulder and Costa Rica for the on-location segments. M.C
